

Share your experiences of mobile work, work injury & return to work

We are researchers at Memorial University conducting a study about work-related injury and return to work for mobile workers and their families.

We want to hear from Atlantic Canadian “mobile workers” – workers who have travelled 1.5 hours or more from home to work (including to another province/territory or offshore), and who were injured or made ill by that “mobile work.”

We want to talk to you about your injury and return-to-work experience.

We will ask you to share your experience with us in a confidential interview (in person or by telephone). As a token of our thanks we will offer you \$50 for your time.

For more information or to set up an interview, please contact Dana Howse at dhowse@mun.ca or (709) 864-7249.
