

# EMERGING SWELLS

How Research Makes a Difference for People and the Environment on Canada's Atlantic Coast

Coastal communities are the most vibrant places on our planet. They throb with unique cultures, diverse business and rich surroundings.

By the end of the twenty first century, most of humanity will live in coastal communities. Keeping them healthy is the key to keeping humanity healthy. So today researchers around the world are engaged in finding sustainable solutions to the unique challenges faced by coastal communities.

Join us this evening to hear how research partnerships in Atlantic Canada are making a difference to our coastal communities.

Where

**Maritime Museum of the Atlantic (Small Crafts Room)**

When

**Monday, June 16<sup>th</sup>**

**7pm Reception (live music and refreshments)**

**7.30pm Main event**

Featuring

**Anthony Charles**, Saint Mary's University

**Ratana Chuenpagdee**, Memorial University of Newfoundland

**Lucia Fanning**, Dalhousie University

**Barbara Neis**, Memorial University of Newfoundland

Hosted by

**Rick Howe**, The Rick Howe Show

Music by

**Lynnae Rose and Friends**

Find out how we can use our coastal resources sustainably

Discover the wealth of knowledge developed by coastal indigenous communities

Discuss how thriving businesses and environmental priorities can reinforce one another

Explore how we can develop the skills we need for the 21st century coastal economy
